Analogue refractometer ORA - H Area of application: Honey

- The models in the KERN ORA-B range are universal, maintenance-free analogue manual refractometers
- The practical and robust design means that it can be used simply, efficiently and on a permanent basis, day in day out
- The manual effort to convert the value is avoided by the use of several selectable scales and thereby eliminates user error
- These scales have been specially developed, calculated precisely and checked. Another key feature is the very thin, clear lines
- The optical system and the prism cover are made from special materials, which enable you to measure with low tolerances
- All models are fitted with an eyepiece which can be adjusted easily and smoothly to different visual capacities
- The models which are marked "ATC" have automatic temperature compensation, which makes it possible to obtain precise measurements at different environmental temperatures (°C - °C)
- Included in the scope of supply:
 - Storage box
 - Calibration solution
 - calibration block
 - Pipette
 - Screwdriver
 - Cleaning cloth
- Further accessories are available as options

Area of application: Honey

The following models are particularly suitable for measuring the Brix value, the water content in honey and the Baumé degree (°Bé) to determine the relative density of liquids

Main areas of application:

- Beekeeping
- Honey production
