Five New Improvements in 2021, to Level Up Your Productivity!

A new central processor unit (CPU) has been used in 442UT, the instrument calculates faster and the battery consumption is lower than before.

The built-in memory storage space has been improved from 4MB to 12MB, which can store 96,000 points.

Trigger Key and standard USB port have been added to 442UT.

Battery compartment is with new design and easier to handle.

Measures Longer and longer,
