Entry level laboratory balance with integrated density determination function

- Density determination made easy! Thanks to the self-explanatory, graphic-assisted control panel, the density of solids and liquids can be determined in seconds, making them ideal for use in schools and universities
Interesting facts about density determination see page Fehler, ungültiger Seitenverweis
- Visualised process means that operating errors are avoided
 - No learning time = reduces costs
 - Ideal for untrained users
- The 4 steps are carried out from left to right:
Tare the balance by pressing the [TARE] key

Select density determination mode (solids/liquids)

Weighing samples/plummets in air

Weighing samples/plummets in liquid. The density will be shown on the display immediately

- Particularly flat design
- Hook for underfloor weighing standard
- Ready for use: battery 9 V Block standard. AUTO-OFF function to preserve the batteries, can be switched off
- Order the appropriate set for density determination at the same time, see accessory
