**KERN PCD ????? ?????????.**  
PCD ? High resolution precision balance with removable display for maximum flexibility

- Versatile positioning of display device for maximum flexibility: screwed onto the front, on a column (optional) or free-standing. Ideal when working in a glove bag or under laboratory fume hoods
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- Freely programmable weighing unit, e. g. display directly in special units such as length of thread g/m, paper weight g/m2, or similar
- Level indicator and foot screws to level the balance precisely, fitted as standard, to give the most accurate weighing results

- Draft shield standard for models with weighing plate size Ø 105 mm
- Note: Individual header data: the free software KERN SHM-01 can be used to print 4 header lines on the printout for printers 911-013 and YKB-01N. You can easily download the software here (unfortunately it cannot be sent out as a CD): Software full-version
