?????????? 9200

1. ??????????: ?????? ??????

The digital 9200 differential manometer offers high accuracy, performance and repeatability. The 9200 pressure meter indicates differential pressure and measures over the range of -100 to 100 mbar with a resolution of 0.1 mbar. The meter features over pressure protection to at least twice the measuring capacity (200 mbar).

This easy to use differential manometer is ideal for plumbers and gas engineers to measure domestic gas pressures and low pressure, non-corrosive air or gases in HVAC applications. The unit can be used to measure air pressure in ductwork or pressure drops across filters to determine performance.
